Our DevOps solutions help you get started quickly and accelerate from there

We have pre-built 6 end-to-end solutions to help you on your journey towards DevOps maturity and GitHub enablement.

Xebia | Microsoft Services

DevOps Enablement, Adoption and Migration

Onboard or further embrace GitHub platform:
1. GitHub enablement & adoption
2. GitHub Actions adoption
3. GitHub migrations

Developer Experience and AI

Further improve experience by leveraging Generative AI and cloud-based development environments:
1. GitHub Copilot Adoption at scale
2. GitHub Codespaces rollout & enablement

Security and Compliance

Embed end-to-end security awareness and tooling in your development lifecycle:
1. GitHub Advanced Security Implementation (with GitHub or Azure DevOps)

These solutions are built from our 60+ offerings for GitHub, including assessments, bootcamps, enablement approaches, trainings and managed services. They are tailored to tackle the typical challenges we see at our customers.

Our preferred approach

Assess/ Prepare
We have pre-built 6 end-to-end solutions to help you on your journey towards DevOps maturity and GitHub enablement.

Enable
We implement, train, migrate, and generally drive enablement across organizations and teams

Improve
We support the steady state phase through managed services and/or ongoing consulting
