We bring scaled enablement to individual teams and the entire organization

Enablement, Adoption and Migration

Developer Experience and AI

Security and Compliance

Inform
- **Awareness sessions** to help stakeholders understand the impact
- **Workshops** to "show, don't tell" how utilizing GitHub can bring change

Prepare
- **Installation:** As needed depending on the situation
- **Migration prep:** Pre-work needed for a successful migration

Enable (Teams)
- **Training:** to help build expertise
- **Workshops:** to identify what needs doing
- **Migration:** where needed/applicable
- **Quickstarts:** to rapidly boost teams

Assess
- **Expectations & ambitions** What you hope to achieve
- **Current situation** Where you are today
- Way forward Roadmap to capture findings & next steps

Enable (Organization)
- **Training** Company-wide trainings
- **Metrics & dashboards** Setting up & dialing in how improvements are to be tracked

Improve
- **ROI Tracking** Keeping track of efforts versus outcomes
- **Improvement tracking** See how teams are doing and supporting as needed
